

Review the case study for the **iProc System** posted under the **Case Studies** folder on Blackboard.

With 2-4 partners, identify and write (by hand or type) complete functional and non-functional requirements for the **iProc** system (posted on Blackboard.) You may organize your analysis using the following format.

Functional Requirements	
Req. #	Complete Statements
FR1	The iProc system must allow authorized buyers to create a new vendor . Each vendor has a unique vendor identification number, vendor name (this is a company name), corporate address (street, city, zip code, country) where the purchase order is sent, contact person (first name and last name), phone number and email address of the contact person.
.	.
.	.
Non-Functional Requirement	
NF1	The iProc System can be accessed by authorized employees, who have login ids and passwords.
